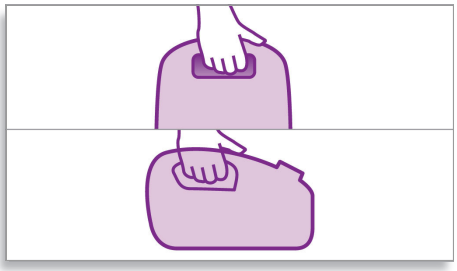
Highlights

New 1250 Watt HD motor
Highly efficient 1250 Watt HD (High Density) motor generates max. 400 Watt suction power, which means that it uses 30% less energy with the same cleaning result as a 2000 Watt appliance.*

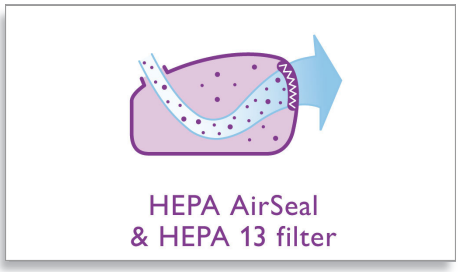
Aerodynamic air channel
The air channel has has been finetuned to make sure the air slides a smooth way out that minimizes noise creation. Additionally a special motor suspension has been developed to reduce vibrations as much as possible.

Comfortable carrying handles



This vacuum cleaner has not one, but two carrying handles. When it is on its wheels, there is a handle on top which enables you to easily move the cleaner around with very little bending. The second handle on the front side of the appliance enables you to comfortably carry it around in an upright position.

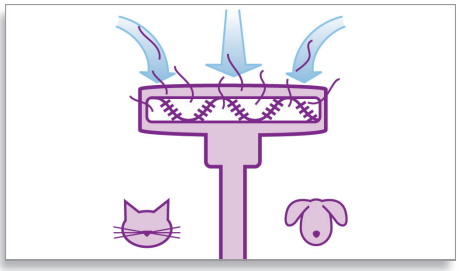
HEPA AirSeal, HEPA 13 filter



This vacuum cleaner has been designed in such a way that all the air taken in is passed through the washable HEPA 13 filter (99.95% filtration) before it is exhausted. No escape is possible.

SilentStar nozzle
This newly designed nozzle contributes to a optimal performance in both low noise and dust and fluff pick up. Additionally the nozzle is very convenient in use thanks to its improved brush pedal switch and easy release knob.

Turbo Brush nozzle



The Turbo Brush nozzle allows deep cleaning of carpets and quick hair and fluff removal from carpets. The rotating brush actively removes small dust particles and hairs, resulting in a 25% better cleaning performance on carpets. The wheels of the nozzle prevent damage in case of use on hard-floors.
